Alpharetta PHP Meetup
Group Founder

Google Glass Explorer

EDUCATION

Georgia Tech
8/00 - 5/03

Southern Polytechnic
6/03 - 5/04

Kennesaw State
1/06 - 5/06

LEADERSHIP ROLES

Village at Weatherstone HOA
President
6/2015-present

Alpharetta PHP Meetup Group
Founder/Organizer
1/2014-6/2015

Freelance & Part Time

8/2016-present

- Helped migrate school website to *Devise* (Laravel-based CRM)
- Client projects in PHP & Onsen mobile app framework
- Created and modified various WordPress plugins, layouts, modules and templates to provide desired event-related functionality

Sylvane

2/2015-7/2016

- Responsible for creating and updating scripts, objects and user interfaces in PHP (Lithium) and Javascript (jQuery), to handle everything from promotional codes in the shopping cart, to adjusting inventory levels between warehouses, to synchronizing those levels with Netsuite
- Racked and configured corporate network and in-house dev server
- Configured and administered Atlassian workflow management tools (Jira, Crowd, Confluence, Bitbucket)

GA Foods

9/2014-2/2015

- Created tablet application for use by fleet of 100+ drivers
- Developed pieces of internal legacy ERP system using PHP and jQuery
- Consolidated and optimized SQL queries throughout ERP system
- Implemented Git as version control system
- Created Vagrant images for development environment

Headway Marketing

5/2011-8/2014

- Helped migrate legacy CRM from ASP3/Access to Laravel, jQuery, Bootstrap and MySQL
- Developed various mapping tools using Google Maps API, other GIS sources, and our school database that allowed clients to create proximity reports and maps for their locations
- Used SilverPop, MailChimp and Mandrill to send emails to customers, and allow email sent to the CRM to populate notes in the system
- Used Google Voice to create click-to-dial functionality in the CRM
- Responsible for installing and configuring Rackspace dedicated and cloud servers

Notivus

4/2010-5/2011

- Developed on boarding system that included user management; group, account and user-based permissions; drag-and-drop interface for workflow creation; document management library; web services integration with backend providers; theme-ability for different clients; searchable audit logs
- Implemented Mercurial as our version control system

GetMarriedMedia

3/2009-4/2010

- Developed bride polling and wedding event management systems using OO PHP5 and jQuery
- Served as company IT support for Windows desktops and Redhat servers

DAD TO 5 SONS

Tyler 18 / James 16
Nick 13 / Tim 13 / Chase 7

-Reveille Software

Cheers for Charity Auction
-Boys & Girls Club of Atlanta

Clinics With Olympians
-Rally Volleyball

Volleyball Tournaments
-Angry Dragon (various)
-Rally Bring It Beach Series
-Atlanta Extreme Open

VOLLEYBALL COACH

'17 River Ridge HS Mens A&B
'17 Cobb Atlanta 14u Girls
'16 River Ridge HS Mens A&B
'16 Crossfire 18u Mens
'16 Crossfire 16u Girls Hybrid
'16 Crossfire 11u Girls

Personal Project

11/2009

- Developed url shortener and QR code generator using MySQL, Apache mod_rewrite and PHP5
- Created detailed statistics page for all shortened urls to track clicks and to break visitors down by browser, OS, and location

IBM

9/2006-2/2009

- Designed database schema and helped code website scheduler for IBM's global on-demand training delivery system
- Created Elab team's workflow management website (CodeIgniter)
- Developed suite of scripts to reimage lab servers and to automatically configure class images and tools for upcoming classes
- Conducted online training presentations often with 20+ brand managers, coordinators and developers
- Racked/installed/maintained farm of 100+ CentOS & Ubuntu servers

Impulse Marketing

1/2004-9/2006

- Designed and coded lead generation system that included user and content management systems, an automatic offer ranking system, various reporting tools, and a template-based offer display module for use on various company product websites.
- Designed and coded company online directory
- Maintained code library for 50+ company product websites (including credit card processing, synchronising data with affiliates, and generation of reports)
- Used SilverPop and internal email servers to send email campaigns

Georgia Tech

6/2001-12/2003

- Implemented first cross-browser, ADA compliant website for Office of Information Technology
- Increased search engine rank from unranked to top five for relevant searches
- Assisted in penetration testing of campus organizations' sites
